CATALYST

Accelerate your kiting...

We like to think our designs are versatile; the Catalyst in my mind is the choice for all-round riding because of its versatility and performance. It can take a beginner safely from the first steps right through to ripping it up in all aspects of the sport. At the same time it can satisfy and impress seasoned riders of all levels.

I personally choose to ride the Catalyst because I know I can depend on it to deliver the performance I want and need to ride to the level I desire. It truly is a kite that can do it all no matter what riding I am doing.

I love to ride waves, the Catalyst is easy to ride even in those critical moments because the kite can float in the air as you cruise down the line or smash the lip. It allows you to concentrate on the wave and not have to worry about perfect kite placement to keep it flying.

When the wind picks up boosting big is always fun and exciting, the Catalyst gets me up there and brings me down softly which is great for my beaten and broken body! It can even handle unhooked riding if that is your thing!

However if it is just cruising with my friends then no matter how flat or choppy the water, I know the Catalyst is going to be a pleasure to ride because of it's smooth forgiving nature and it's performance both up and down wind.

The 2011 Catalyst really is the bomb, it's got smooth progressive handling, awesome de-power characteristics and has a simple effective safety system.

In short if you want a kite that delivers in all categories then the Catalyst will deliver as much for you as it does for me.

Rob Whittall

Rob Whittall – Ozone Kites Designer

Package Contents

Large duffel bag design with...

- Kite inner bag
- Waist strap and chest strap
- Top inner pocket for keys, mobile etc.
- Compression straps to carry extra kite or board
- Padded shoulder straps
- Webbing compression strap to secure kite
- Repair pack
- Comprehensive user manual, stickers & key ring.

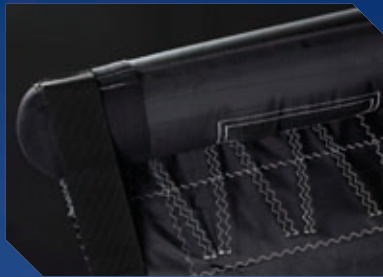

CATALYST

Sizes: 4 6 8 10 12 14

- New high volume inflate/deflate valve for quicker setup and pack down

- New tip line guard and leading edge ends

- New segmented strut construction for improved canopy stability

- Multiple trimming options for customized handling and bar pressure

Design Features

- New high volume inflate/deflate valve for quicker setup and pack down
- New tip line guard and leading edge ends
- New strut construction for improved canopy stability
- New Contact Water Control System
- Smoother handling
- 4-line pulley-less system (no pulleys, no problems)
- Easy on the bar back line re-launch
- Mega de-power range
- Comparable feeling throughout the size range
- One-Pump system for quick and easy setup
- Multiple trimming options for customized handling and bar pressure
- Color coded and numbered fool proof line connectors

Construction Features

- New internal reinforcements for improved durability
- Exceptional hand checked Ozone factory construction using the highest quality materials
- Teijin Techno Force sail material
- Dimension Polyant Dacron for the LE & Struts
- Double stitched bonded seams
- Dacron reinforced tip area for load distribution
- Reinforced leading edge and struts in high stress areas
- Reinforced trailing edge
- Light weight & low profile aerodynamic leading edge scuff pads
- Unique bladder construction with double layer section in wear areas
- Ozone warranty and back-up service guaranteed
