OZONE >> THE REAL DEAL

NEXT GENERATION DESIGN EVOLUTION

**DESIGN FEATURES**

- Huge D-Power range
- Fast yet predictable turn
- Rock-Solid Stability
- New Control Bar with Moulded Chickenloop
- 4 x Coloured flying lines to stand out on snow
- New Large Technical Backpack
- Easy Handling and easy re-launch
- Dirt-Outs in tips
- Highest Spec 40D Nylon Rip-Stop
- Double stitched seams
- Un-matched back-up service & support

ACCESS XC 09

The Access XC is designed for taking beginner snowkiters X-Country into the back country; it's the ultimate personal ski-lift to take you wherever you wish to go.

The ultimate Global Season Pass. For the 09 season we have updated the Access with a new bar in 54cm for all sizes, a completely new backpack design and all new colours for '09.

The Access has become one of our most successful designs to date. It is the ultimate kite for anyone new to snowkiting giving the rider un-matched peace of mind and security and is the choice of every leading snowkite school in the World.

**SIZES: 4 • 6 • 8 • 10**

**DESIGN FEATURES**

- The Original Ozone Y-Line design: 3 x 25m lines from bar splitting to 4 at kite
- Super fast turn with a tight radius – perfect for climbing mountains
- Double Pulley Speed System giving mental D-Power range
- X-Line – Anti Tangle system
- Rock-Solid Stability
- New Control Bar with Moulded Chickenloop
- New “Patent Pending” RE-Ride safety system
- New Large Technical Backcountry Backpack
- Dirt-Outs in tips
- Highest Spec 40D Nylon Rip-Stop
- Double stitched seams

FREZY FYX

The Frenzy has been the benchmark for D-Power foil design since 2001. Our designers have spent over one year working on the development of the FYX, the result is a technical masterpiece combining performance and ease of use like never before.

Robbie has created the FYX based on the design of the Legendary Manta II. The FYX shares the same technically advanced Ozone “Speed System” with a double pulley on each side that allows the angle of attack (D-Power) to be changed minutely which results in the smoothest progression from full power to full D-Power.

The Double Pulley speed system is designed to work in harmony with the Y-Line design, bridle plan, sail tension and profile. The balance of the design is what makes the mid-aspect FYX such a solid performer with unbeatable stability, turning speed, low end power and impressive D-Power.

MANTA II 09

The high aspect MANTA II became known as the Snowkite of choice for experienced kiters last season, the ultimate backcountry tool for those in the know.

The handling and performance allows the rider to push their level further than ever before making this the ultimate kite for experienced riders.

Chasta's kite of choice: “The Manta is amazing, I love this kite. The Manta II makes me feel that there are no limits to what I can achieve”

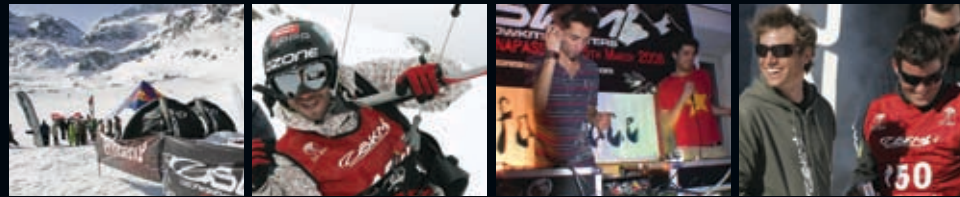

For the 09 Season the Manta II has been updated with an improved trim for more performance, comes with our new “Patent Pending” Control System, new Backcountry Technical backpack, safety leash and in new colours.

## DESIGN EVOLUTION

## WELCOME TO OZONE

Ozone is more than just a kite company; we are a group of friends united in our passion to design products to the highest level. Our background is diverse; each member brings industry leading experience to the table creating products that we love to ride or fly.

Our founding design team have been involved in air and wind sport aeronautical design with years of hands on experience. David Pilkington, a Dr in Aerodynamics having worked for British aerospace previously to Ozone. Robbie Whittall who started flying Hang-Gliders aged 16 (1986), World Champion by 18 and Paragliding World Champion by 19. Robbie worked for some of the World's leading designers as a test pilot and trimmer.

This type of experience is the foundation of our ability to create industry leading designs with 20+ years experience in the wind-sports industry. The icing on the cake is our manufacturing facility founded in Vietnam by David that gives us a quality unique only to Ozone.

Test fly or inspect one of our kites to see and feel the Ozone difference. Design, Development and testing never stops. We often get asked if there is something new coming, you bet there is, we have restless minds and as one job is finished the idea is already born of how to make it better. On top of that we back up our products 100%. If you have a problem we deal with it giving you leading industry service & support.

For more detailed info including demos, videos, regular news make sure you check out our ever evolving website. WWW.FLYOZONE.COM

## SNOWKITING >> THINK OZONE

From our first session snowkiting in 2001 at the legendary snowkite spot the Col De Lauteret, we knew there was a need for the ultimate snowkite to be designed.

So we created the world's first specific snowkite, The Frenzy, an open cell D-Power-able foil, the correct tool to access backcountry snowfields and mountains.

So much has been achieved in the world of snowkiting by Ozone riders all over the world since then, pushing back the boundaries of design and what the sport can offer us all.

Our latest range of snowkites give you the ability to choose a model that best suits your riding level, giving you peace of mind that it's been designed and tested by the world's leading snowkiters in all conditions all over the world.

“The Manta is amazing, I love this kite. The Manta II makes me feel that there are no limits to what I can achieve...”  
*Chasta's kite of choice*

## CONTROL SYSTEM

In 2005 we introduced our “leash-less” RE-RIDE safety system which meant no more leash tangles or hassles when riding. Our design has since been copied by many brands, the biggest compliment we can think of!

Robbie, Ozone's designer and one of the most active snowkiters in the World has had his creative energies flowing the past year! To compliment his new designs, the FRENZY FYX and the MANTA II 09, Rob re-designed his “RE-RIDE” safety system. The “Patent Pending” system is simpler and more effective whilst being easier to reload once activated.

The new Control System with our moulded “Megatron” Chicken-loop, trim buckles, new plastic bar ends and Robbie's cleaner safety system gives you the ultimate bar in one length (54cm) that works for all sizes of Frenzy FYX and Manta II.
